- B. Informational Note:** The State has received the following procedural question related to the construction of the Cost Proposal:

I had a question regarding the TCO worksheet and was unable to find an answer to the question within the documentation provided by the State to date. For any of the Software / Hardware that has been proposed as an exception to the State standards, there appears no way to include those products and their associated costs into the TCO worksheet. Can you please provide direction on how these costs should be reflected in the overall cost proposal?

This question was received after the deadline for Written Comments. However, the State has already addressed this issue in its previous response to Question #76, in Amendment #3 posted on October 1, 2007, so we wish to call that to each vendor's attention.
